PROFILE

Project Manager turned Product thinker. AI degree with hands on experience in writing specs, prioritizing backlogs, and shipping SaaS and AI features across fast moving client engagements. PMI-CPMAI certified with a technical foundation in LLMs, data systems, and product delivery.

EDUCATION

Bachelors in Artificial Intelligence — FAST-NUCES

Sept 2021 - July 2025

WORK EXPERIENCE

Project Manager | Full-time @ CCR IPT Agency | Remote

Sept 2025 - Present

- Authored PRDs and feature specs for **19 client products** across SaaS and AI engagements, translating stakeholder requirements into actionable engineering briefs that shipped on schedule.
- Prioritized product backlogs and defined acceptance criteria for multiple features across **12 clients**, reducing rework cycles by **40%**.
- Replaced ad-hoc client communication with structured reporting, decreasing response lag on blockers and improving on-time delivery rate and prototype low-fidelity concepts.
- Pushed back on and renegotiated scope on **9 fixed-price engagements**, introducing change request workflows that prevented unplanned features from entering development without approval.
- Built a real-time delivery tracking system across **19 concurrent projects** on ClickUp, reducing missed deadlines by **80%** and cutting last-minute client escalations from approx **60% to 10% per month**.
- Partnered with engineering and clients on **19 AI/SaaS product builds**, owning feature feedback loops from discovery through QA, User research through surveys and contributing directly to **16 shipped releases**.

GenAI Powered Data Analytics | intern @ TATA Group

June 2025 - July 2025

- Conducted EDA on textual and numerical data using Python and SQL, surfacing key trends to support strategic reporting.
- Built PowerBI dashboards and visualizations to enable data-driven decision making for stakeholders.

Software Engineer | intern @ Quantum

Feb 2025 - March 2025

- Participated in 2-week Agile sprints, contributing to **4 features** and improving team velocity by **40%**.
- Designed and executed major test cases for multiple features achieving **90% coverage** and catching critical bugs pre-release.

CERTIFICATIONS

- Practical Application of Generative AI for Project Managers | PMI
- Product Management Simulation | EA
- PMI Certified Professional in Managing AI (PMI-CPMAI)™ | PMI
- Agile Project Management Foundation | SIEMENS

KEY SKILLS / CORE COMPETENCIES

Tools & Technical: Jira, ClickUp, Linear, Notion, Confluence, MS Project, Google Workspace, SQL, Zapier, LLMs, Prompt Engineering, Generative AI (GenAI), AI Product Development, Model Evaluation, API Integration, Data Pipelines, NLP, Technical Product Management

Product Management: Product Roadmap, PRD, Feature Prioritization (RICE, MoSCoW), User Story Mapping, Product Discovery, Go-to-Market (GTM), OKRs & KPIs, A/B Testing, Customer Journey Mapping, Voice of the Customer (VoC)

Process & Operations: Sprint Planning, Backlog Grooming & Refinement, Stakeholder Alignment, Cross-Functional Collaboration, Product Lifecycle Management, Launch Planning

CASE STUDIES

- Designing for People Who Don't Want to "Use Products"
- Why most productivity tools fail, and how I'd fix it
- If LinkedIn Didn't Exist Today, Would Anyone Build It?
- Building a Product With Zero Features (MVP Thought Experiment)
